

About the Transition to ISO/IEC 27006-1:2024 Standard!

The ISO/IEC 27006 standard, which defines requirements for bodies providing certification of Information Security Management Systems (ISMS), has been revised as ISO/IEC 27006-1:2024 as of 2024.

The transition process to ISO/IEC 27006-1:2024 is being managed in accordance with the timelines defined by the accreditation bodies.

In this context, KingCert has initiated its transition and is actively managing the process in line with the standard requirements and the expectations of the accreditation authority.

As of 31.05.2025, all ISO/IEC 27001 certification activities (initial certification, surveillance, and recertification) will be conducted fully in compliance with ISO/IEC 27006-1:2024.

Upon successful completion of the transition and approval by our accreditation body, all ISMS certificates issued by KingCert will clearly reflect compliance with the new version.

This revision does not require any mandatory changes to the management systems of currently certified organizations. However, in line with our transparency policy, we are informing both our existing and prospective clients about the transition.

For further details or any questions, feel free to contact our team.
